

# GO AHEAD, BRAG a little

Use these templates to complete the brag book project  
in the December 2006 *Family Tree Magazine*.

This template is sized for Canson's 6x6-inch spiral-bound album. If your album is a different size, it's easy to adjust the template:

1. Cut your cover pieces to the size of your album cover plus  $\frac{1}{2}$  inch in width, and plus 1 inch in height.
2. Cut your inside cover pieces to the size of your album cover minus  $\frac{3}{4}$  inch across, and minus  $\frac{1}{2}$  inch in height.
3. Cut your spine piece wide enough to wrap around your album spine plus  $1\frac{1}{2}$  inch (you'll glue  $\frac{3}{4}$  inch to the front cover and  $\frac{3}{4}$  inch to the back cover). Cut the spine to the height of the cover plus 1 inch. Before gluing the spine to the album, fold down the top edge  $\frac{1}{2}$  inch and fold up the bottom edge  $\frac{1}{2}$  inch, and glue down the flaps.
